

*Green County Livestock Facility Study Group*  
**RECOMMENDATIONS BY DEPARTMENT**  
**Green County UW-Extension**

Green County UW-Extension was identified as the lead organization for the following recommendations. Recommendation numbers correspond with the numbers within the Livestock Facility Study Group Report & Recommendations document.

**COMMUNITY MAPPING & MONITORING (page 25)**

**MONITORING (page 25)**

*3. Coordinate well water test results, which are required to be taken every 15 months, to establish water quality trend data.*

- Rationale: This can be used to make decisions to reduce groundwater contamination.
  
- Note: The Green County Land and Water Conservation Department, Green County Health Department, and Green County UW-Extension were all identified as lead stakeholders for this recommendation.

**BEST PRACTICES & OUTREACH (page 27)**

**OUTREACH (page 27)**

*4. Increase education and outreach to landowners regarding the Wisconsin Manure Runoff Prediction website.*

- Rationale: Increase awareness of weather-related impacts on surface water runoff.
- Note: The Green County Land and Water Conservation Department and Green County UW-Extension were both identified as lead stakeholders for this recommendation.
