

Record birds that you see, especially the first migrating birds in spring and fall. You may identify some birds only by their sounds or shilhouettes, add them to you journal too.

Use bird books for identification or use an internet website such as Cornell Birds at https://www.birds.cornell.edu/home/

🐙 Some birds are "Resident Birds" & others are "Migrating Birds". Some migrating birds may be just passing through your area.

Have fun, compare & share your bird journal with your family & friends.

Key: Date; Time; Location; Bird Name ; Season = fall, spring, winter summer; Temp = Temperature; Weather = sunny, rainy, fog, cloudy, snow etc; Quantity Spotted = Number of birds;

Date	Time	Location	Bird Name	Season	Temp	Weather	Quantity Spotted	M/F/J/UK	R/M
