An EEO/AA employer, University of Wisconsin-Madison Division of Extension provides equal opportunities in employment and programming, including Title VI, Title IX, the Americans with Disabilities Act (ADA) and Section 504 of the Rehabilitation Act requirements

Badger Dairy Insight

Written by: Jackie McCarville, Regional Extension Dairy Educator

November-Handling cows is necessary to harvest milk and provide animal care, but these interactions also present a risk of injury to personnel. Inappropriate cow handling threatens animal welfare, milk production, and public trust in dairy farming. But how can the industry best teach these skills? Interactive learning experiences can help build confidence by allowing dairy workers to actively participate in their own training.

Interactive training methods, such as group activities, simulations, games or other hands-on methods, keep employees engaged in the learning process and create a safe space for questions. In collaboration with Wisconsin dairy stakeholders, Extension Dairy Welfare Specialist & UW Madison Department of Animal & Dairy Science Assistant Professor, Jennifer Van Os, created an innovative learning tool for people to practice the appropriate handling of dairy cows.

Join Jennifer Van Os and Extension Farm Management Specialist Jim Versweyvel as they discuss interactive learning and the Mooving Cows (TM) digital educational game in which learners practice moving cows in simulated dairy farm environments. The game, like a flight simulator, is a way for participants to “learn by doing.” The learning objectives in the game are to understand how human actions affect cow behavior, stress, productivity, and worker safety.

December-Faith Reyes and Carolina Pinzón, newly appointed statewide Dairy Outreach Specialists at the University of Wisconsin – Madison Division of Extension, will be presenting this webinar to provide participants with a comprehensive understanding of effective dairy animal handling, grouping strategies and their impact on efficiency in the parlor and beyond.

Cold Stress in Dairy Calves

Raising calves is a huge expense on any dairy farm and getting them off to a great start is important in cold weather as much as warm weather. Cold stress can increase the risk of disease in pre-weaned calves. Additionally, growth rates can plummet during the cold months unless we provide energy through a higher plane of nutrition or preserve energy by improving the calf's environment. The thermoneutral zone is the temperature range where calves use no additional energy to maintain their core body temperature. A calf is born with only two to four percent of body weight as fat. If forced to burn fat to maintain body temperature, calves will typically have lower growth rates or compromised immune status. If not managed well, death rates in calves are higher during cold weather.

DID YOU KNOW GREEN COUNTY DHIA OFFERS MORE THAN JUST MILK TESTING?

Milk Testing provides the benefits that include milk weights, somatic cell count, butterfat, and protein. Green County DHIA also has the capability to pregnancy check (milk and blood serum); test for Johnes (milk sample); and do A1/A2 testing, BVD, Leukosis, and MUN (milk samples). Mastitis samples can test for 4 or 16 pathogens along with pooled samples. Diagnostics can easily be tested with milk samples pulled on test day.

Description	Price	Sample Type
MUN/Milking Cows	\$.25	Milk
Milk Pregnancy Test 1-10 Samples	\$5.00	Milk
Pregnancy Blood Samples	\$5.25	Blood Serum
BVD	\$5.00	Milk
Johnes	\$5.00	Milk
Leukosis	\$5.00	Milk
Mastitis Contagious 4-Panel (4 Pathogens-detects M bovis, Strep Ag., Staph Aureus, & Strep Uberis)	\$30.00	Milk
Mastitis Complete 16 PCR (16 Pathogens– detects Staph aureus, Strep ag., Prototheca, Staph species, Strep dysgalactiae, Strep uberis, Klebsiella pneumoniae & oxytoca, E coli, M bovis, Corynebacterium bovis, Enterococcus faecalis & faecium, Serratia marcescens, Arcanobacterium pyogenes & Peptostreptococcus indolicus, Steph beta-lactamase gene, Mycoplasma species, and Yeast)	\$40.00	Milk

Dairy record keeping not only benefits the farmer but the cows as well to better understand the herd as a whole and individual cows. Farmers can keep better data and records on cows, calves, heifers and even bulls to improve herd health, genetics, and milk production.
