Badger Dairy Insight — *Balancing diets for energy and amino acids to maximize milk components*

Written by: Jackie McCarville, Regional Extension Dairy Educator

In this presentation, Sebastian I Arriola Apelo, Assistant Professor of Metabolism at UW-Madison in the Animal & Dairy Sciences Department, will discuss amino acid balancing when feeding different energy sources to maximize milk protein and fat. Discussion will include various scenarios, including consideration of an induced milk fat depression. Amino acid balancing strategies will be focused on commercially available rumen protected amino acids and bypass proteins.

It's Proof Time! How You Can Decode Dairy Sire Summaries

Submitted by: Matt Lippert and Ryan Sterry

The Council for Dairy Cattle Breeding (CDCB; <https://uscddb.com/merit-selection/>) releases updated dairy sire summaries in April, August, and December. The science of sire summaries has changed in recent years. More traits, especially for health, longevity, and efficiency can now be evaluated and included for selection. In addition, the inclusion of genomic data has made it possible to identify superior sires more rapidly. With all the information available today, dairy producers may be wondering where to begin the selection process.

Sire proofs can contain a lot of abbreviations, acronyms, and terminology. A sire proof can be broken down into a few main parts:

- **Animal and pedigree information:** Registered name, National Association of Animal Breeders (NAAB) code, breeder, sire, dam, and maternal grandsire.
- **Production traits:** milk, fat, protein, etc.
- **Type:** overall final classification score, udder, feet and leg, and body composite; **linear profile:** detailed breakdown of body, udder, and feet and leg traits.
- **Fitness and additional traits:** calving ease, daughter pregnancy rate, productive life, sire conception rate, mastitis, metritis, DA, and more.

Hello! My name is Jordyn Sattler and I am the new local Regional Crops and Soils Educator for UW-Extension. I graduated from UW-Platteville in 2013 as a double major in Agricultural Education (Non-Teaching) and Soil & Crop Science with a Plant Breeding and Genetics emphasis. Since then, I have spent most of my time working as a retail sales agronomist in Southern Wisconsin and Northern Illinois. I am excited to start meeting with local producers and providing resources and information that will help farms achieve their individual goals.
