2025 Wisconsin Custom Rate Survey

We are conducting a survey to estimate custom rates for common Wisconsin farming operations. If you are a Wisconsin farmer or a custom operator who performed or hired custom services in 2024, please follow the link: <https://go.wisc.edu/CustomRates>

You need only complete the sections of the survey that pertain to you. The survey asks about custom rates for tillage; planting and seeding; fertilizer and chemical application; manure services; grain harvesting, hauling and drying; silage, haylage, and hay services; and tractor and machinery rental.

The survey should take at most about 15 minutes to complete. Your participation is entirely voluntary. You can choose to exit at any time and skip sections that do not pertain to you. Your responses will be confidential, and published results will be anonymous. The survey is funded by the Division of Extension at the University of Wisconsin-Madison.

To show our appreciation, those who complete the survey with valid responses can enter a raffle for one of ten Fleet Farm or Cabela's gift cards for \$100. You will be asked to provide contact details at the end of the survey for the raffle.

If you have any questions or concerns, contact Paul Mitchell at pdmitchell@wisc.edu or (608) 320-1162 or Brian Luck at bluck@wisc.edu or (608) 890-1861.

Air Quality in Calf Housing Written by: Nesli Akdeniz and Jackie McCarville

Proper housing is essential for the health and growth of dairy and beef calves. It provides a clean, dry, and comfortable environment to support healthy development and minimize disease risks.

Calf hutches

Calf hutches are typically constructed from polyethylene or fiberglass, providing shelter from environmental conditions. By minimizing direct contact between calves, hutches reduce the risk of disease transmission. They allow close monitoring of each calf, facilitating early disease detection and personalized feeding strategies when needed. Proper placement of hutches facing away from prevailing winds and adequate spacing prevent contamination between calves. During colder months, deep bedding, often straw, is utilized, allowing calves to nest comfortably and maintain body heat.

DID YOU KNOW GREEN COUNTY DHIA OFFERS MORE THAN JUST MILK TESTING?

Milk Testing provides the benefits that include milk weights, somatic cell count, butterfat, and protein. Green County DHIA also has the capability to pregnancy check (milk and blood serum); test for Johnes (milk sample); and do A1/A2 testing, BVD, Leukosis, and MUN (milk samples). Mastitis samples can test for 4 or 16 pathogens along with pooled samples. Diagnostics can easily be tested with milk samples pulled on test day.
